Network and station security

Case study – ST.LAZARE PARIS

- major renovation of the station
- creation of a shopping mall in the heart of the station
Network and station security

Security management at St Lazare

- The local security delegate (DLS)
  - a key member of the station management team.
  - everyday role
  - other responsibilities

The knowledge and experience of the DLS and other security stakeholders were integrated into the renovation process.

Mr. Didier Schwartz - SNCF – Managing Security at French Stations
Network and station security

Security management at St Lazare

- Staff access to protected areas
- On-station security personnel

Mr. Didier Schwartz - SNCF – Managing Security at French Stations
Network and station security

Security surveillance at St Lazare

- A local security control centre in permanent liaison with the National Security Control Centre (PCNS)
- A CCTV system consisting of nearly 300 cameras

SNCF security staff (SUGE) are authorised to use and supply video recordings to legally authorised parties (police, judicial authorities... )

Mr. Didier Schwartz - SNCF – Managing Security at French Stations
Security at major events

Case study – La Plaine Stade de France - a suburban train station serving France’s national sports stadium

- Key facts
- Our role
Security at major events

Managing passenger flows in coordination with police

1. Passengers are held on platform access ramps
2. A police barrage is set up to prevent access by additional spectators
3. Platform access ramps are opened when train arrives
Security at major events

Managing passenger flows in coordination with police

4. the police barrage is lifted to allow access to platform ramps

5. access is closed to platforms / train leaves / ramps are refilled…

…the process is repeated as required, enabling swift, safe and efficient evacuation of spectators from stadium to trains

Mr. Didier Schwartz - SNCF – Managing Security at French Stations
...Thank you
for your kind attention
