Stakeholders, a central matter of concern…

16 > Employees
- Employees considered individually
- Labour organisations representing employees
- The works committee
- Employees of other companies in the airport facilities

26 > Customers
- Airlines
- Passengers and people accompanying them
- Ground handling companies
- Retailers in the air terminal
- Tenants outside of the air terminal

32 > Economic partners
- Sub-contractors
- Suppliers
- Ground transport providers

42 > Public bodies and public interest organisations
- European institutions
- The State and its administrative departments
- Professional organisations
- Social-economic organisations
- Environmental organisations
- Independent authorities

48 > Civil society
- Local residents
- Local authorities and elected representatives
- Associations
- Non-governmental organisations
- Opinion makers and communicators
- International civil society
- Professional auditors

38 > Financial partners
- Reference shareholder: the State
- Private shareholders
- Institutional shareholders
- Financial analysts and the specialist press
- Financial rating agencies

CHILD CARE AT PARIS-CHARLES DE GAULLE AIRPORT

The ‘Globe-Trotteurs’ intercompany day nursery opened its doors at Paris-Charles de Gaulle airport on 2 January 2006. The main aim of the nursery is to meet the needs of parents working unusual hours, something which is frequent at airports like Paris-Charles de Gaulle that operate 24 hours per day.

The nursery’s 600 m² space has room for 60 cots which, given the staff turn around, is enough to take in 180 children. Making the project a reality required coordination of the needs of the staff of partner companies: Aéroports de Paris, Air France, Servair, Alyzia, Sodexi and Select Service Partner. The operation is co-financed by the founding companies and by the four neighbouring departmental (county) councils. In cases of emergency, even parents who are not registered at the nursery can benefit from its services. Overall, the advantages to families are significant, as some parents work close to the nursery and the charges are the same as for a municipal nursery.
Sustainable Development applied to the Economic pillar

**DATAGORA: A HIGH PERFORMANCE RESOURCE FOR REGIONAL DEVELOPMENT**

Datagora is a resource and development centre for the greater Roissy area that includes three neighbouring departments. As its name implies, Datagora brings together social, environmental, geographical and socio-economic data in a single space. Datagora provides a single entry point for investors looking to set up in the region. It has three main objectives: to develop the major advantages and economic resources of airports, to develop new wealth by attracting international companies and to create new job opportunities for the local populations. In 2006, Datagora organised 193 conferences, 22 of which were for investors, attended by 1,500 visitors. The partners in this innovative scheme are the Île-de-France regional council; the councils of Seine-et-Marne, Seine-Saint-Denis and Val-d’Oise; and the main regional development agencies.
